Profile

Motivated and enthusiastic recent graduate with a degree in Bachelor of Computer Applications from Kuvempu University. Eager to apply strong analytical skills and a passion for computer programming and web development in a dynamic work environment. Proficient in programming languages, data analysis, software development, communication. Demonstrated ability to learn quickly and work collaboratively through academic projects and internships. Seeking an entry-level position to contribute to team success and gain valuable industry experience.

Projects and Internship

LODGING MANAGEMENT SYSTEM | MAY 2024 – AUGUST 2024

· Designed and developed a website for the lodging indudtry helping the employees of the particular organization to maintain and store the records digitally rather than manually.

· Implemented the logic code for the website using the scripting language php(hypertext preprocessor). The appearance of the website was deigned using HTML(hypertext markup language) and CSS(cascading style sheet).

INNOVANT IT SOLUTIONS | JUNE 2024 – AUGUST 2024

· The project on lodging management system was performed under the supervision of Innovant IT Solutions, Shimoga, Karnataka.

· The internship I performed for IITS was a very big opportunity for me to test all my skills and execute them accordingly under their guidance and supervision.
